

KANAKA V Y

Aspiring Artificial Intelligence and Machine Learning Engineer

kanakayogesh2003@gmail.com | [linkedin.com/in/kanaka-v-y-1811s28](https://www.linkedin.com/in/kanaka-v-y-1811s28) | 8310143950 | github.com/Kanaka-VY | [Portfolio](#) | Bengaluru, Karnataka

SUMMARY

AI & Machine Learning Engineer with hands-on experience in Computer Vision, Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and MLOps. Proficient in Python, TensorFlow, PyTorch, SQL, FastAPI, Docker, and Git, with practical experience gained through internships and real-world AI projects. Passionate about developing scalable, data-driven AI solutions to solve real-world business problems.

EXPERIENCE

Campus PE | Gen AI Intern | Feb 2026 – May 2026

- Developed Generative AI and Large Language Model (LLM) solutions using prompt engineering techniques to enhance response quality and optimize AI-driven workflows.

Samsung Innovation Campus | IoT Intern | Oct 2024 – May 2025

- Developed IoT-based solutions by integrating sensors and hardware with data systems, enabling real-time monitoring and reliable device communication.

EDUCATION

Don Bosco Institute of Technology, Bengaluru	2022-2026 Bengaluru
B.E. in Artificial Intelligence and Machine Learning CGPA: 8.56	
Smt Pushpa Shananuru Mahalingappa PU College PCMB: 96%	2019-2021 Davangere
Shree Sharada English Medium High School SSLC: 93%	2019 Haveri

TECHNICAL SKILLS

- Programming Languages:** Python, SQL
- Machine Learning & AI:** Scikit-Learn, TensorFlow, PyTorch, Computer Vision, Deep Learning, Generative AI, LLMs, Prompt Engineering
- Data Analytics & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, Microsoft Excel
- MLOps & Deployment:** FastAPI, MLflow, Docker, GitHub Actions, REST APIs, CI/CD
- Cloud & Gen AI:** Google Cloud Platform (GCP), Vertex AI, Gemini API, Vector Databases, Retrieval-Augmented Generation (RAG)
- Version Control:** Git, GitHub
- Core Concepts:** Statistics, Probability, Linear Algebra, Feature Engineering, Model Evaluation, Data Preprocessing

PROJECT EXPERIENCE

Omni RAG - Multimodal Enterprise RAG Platform (LLMOps + MLOps)

- Developed a multimodal Enterprise RAG platform using Unstructured.io, Qdrant, and LLMs for intelligent document retrieval from PDFs, tables, charts, and images, integrating GitHub Actions, MLflow, PyTest, Arize Phoenix, and RAGAS for automated deployment, monitoring, and evaluation

AI Based Smart Eye for Blind People

- Developed an AI-powered assistive system using YOLOv8, Computer Vision, OCR, and Text-to-Speech for real-time object, obstacle, and currency recognition with 90% accuracy, providing voice guidance for visually impaired users

IoT Based Industrial Safety and Monitoring System

- Developed an IoT-based industrial safety and monitoring system using Arduino, ultrasonic sensors, and automated motor control for real-time hazard detection, environmental monitoring, and workplace safety management

Real-Time Sign Language Translation

- Developed a real-time Sign Language Translation system using Deep Learning and Computer Vision to recognize hand gestures and convert them into text and speech for enhanced communication

CERTIFICATIONS

- Generative AI & Large Language Models Internship – Campus PE (2026)
- Samsung Innovation Campus – IoT Systems & Protocols Internship (2025)
- IBM SkillsBuild – Machine Learning Methods & Tools | Artificial Intelligence Fundamentals
- Infosys Springboard – Machine Learning with Python | Prompt Engineering
