

KANAKA V Y

Aspiring Artificial Intelligence and Machine Learning Engineer

kanakayogesh2003@gmail.com | [linkedin.com/in/kanaka-v-y-1811s28](https://www.linkedin.com/in/kanaka-v-y-1811s28) | 8310143950 | github.com/Kanaka-VY | Bengaluru, Karnataka

SUMMARY

Aspiring Artificial Intelligence and Machine Learning Engineer with a strong foundation in Python programming and data analytics. Passionate about developing scalable AI solutions and equipped with hands-on experience gained through academic projects and internships. Eager to leverage innovative AI technologies to drive impactful and data-driven solutions.

EXPERIENCE

Campus PE | Gen AI Intern | Feb 2026 – May 2026

- Engineered scalable Generative AI and Large Language Model (LLM) solutions using advanced prompt engineering techniques, improving response accuracy and workflow efficiency by **30%**.

Samsung Innovation Campus | IoT Intern | Oct 2024 – May 2025

- Collaborated on integrating IoT hardware with data systems, improving device communication efficiency by **25%** and enabling reliable smart network functionalities

EDUCATION

Don Bosco Institute of Technology, Bengaluru

2022-2026 | Bengaluru

B.E. in Artificial Intelligence and Machine Learning CGPA: 8.56

Smt Pushpa Shamanuru Mahalingappa PU College | PCMB: 96%

2019-2021 | Davangere

Shree Sharada English Medium High School | SSLC: 93%

2019|Haveri

TECHNICAL SKILLS

- Programming Languages & Platforms:** Python, SQL, Excel, Git, GitHub
- AI & Machine Learning:** Generative AI, Large Language Models (LLMs), Prompt Engineering, Computer Vision, Deep Learning
- ML Frameworks & Data Libraries:** Scikit-Learn, TensorFlow, PyTorch, Pandas, NumPy
- Data Analytics & Visualization:** Power BI, Microsoft Excel, Matplotlib, Seaborn
- MLOps & Deployment:** MLflow, Docker, FastAPI, REST APIs, GitHub Actions, CI/CD
- Cloud & Gen AI:** GCP, Vertex AI, Gemini API, Vector Databases, RAG
- Core Concepts:** Statistics, Probability, Linear Algebra, Feature Engineering, Model Evaluation

PROJECT EXPERIENCE

Omni RAG: Multimodal Enterprise RAG Platform (LLMOps + MLOps)

- Built a multimodal Enterprise RAG platform using Unstructured.io, Qdrant, and LLMs to deliver real-time answers from document text, tables, and charts, while implementing an automated LLMOps/MLOps pipeline with GitHub Actions CI/CD, PyTest, Arize Phoenix, and RAGAS for deployment, monitoring, and evaluation.

AI Based Smart Eye for Blind People

- Engineered an AI-powered assistive device using computer vision and speech synthesis for real-time object, obstacle, and currency recognition with 90% accuracy, providing audio feedback for visually impaired users.

IoT Based Industrial Safety and Monitoring System

- Designed an IoT-enabled industrial safety solution for real-time workplace monitoring and compliance management.

Real-Time Sign Language Translation

- Implemented a deep learning and computer vision system for real-time sign-to-text and speech conversion.

CERTIFICATIONS

- Completed Generative AI & Large Language Models (LLMs) Internship Certification from Campus PE (2026)
- Completed The IoT Systems and Protocols Internship Certification from Samsung Innovation Campus (2025)

SOFT SKILLS

Team collaboration | Continuous Learning | Quick Learner | Communication Skills | Problem Solving
